Jamie McGraner

Software Development Engineer

(614)-589-8729   jamie.danielle12@yahoo.com   Denver, CO   LinkedIn

Summary/Objective

Drawing on a decade of experience as a chef, I have seamlessly translated numerous skills from the vibrant restaurant industry into the realm of software development. By harnessing my unwavering commitment to precision, effective communication, and adept problem-solving honed during my culinary journey, I've adeptly surmounted challenges as an engineer during the application development process.

Skills

- Python
- HTML/CSS
- JavaScript/Node.js
- Web APIs
- SQL/PostgreSQL
- Flask

Projects

WEATHER REPORT

- A real time temperature and weather website using API calls.
- JavaScript, HTML, CSS, DOM manipulation, Axios, and Event Handling

OTTER FANSITE

- An informative fansite dedicated to otters, including fun facts and a gallery.
- Static HTML, applied visual styles with CSS, and deployed using Render.

TASK LIST API

- A web API to organize tasks, with the ability to sort tasks, mark complete tasks, and get feedback via Slack. Working with Flask to create models while using Python to call an API inside of an API.
- Python, Flask, Render and Postman.

SWAP MEET

- Backend logic built to swap items between different inventories by importing modules, creating classes with attributes and instance methods and implementing inheritance.
- Python focused.

Education/Organizations

ADA Developers Academy

Certificate Earned, 2023

Rewriting The Code

Member - 2023

Certifications

Full Stack Developer Certificate - 2023

Information Technology - 2023

Python 2 Certificate - 2022

Activities

In my free time, I play roller derby for Denver Roller Derby. I also enjoy baking, paddle boarding, and yoga.
